

**SD1**

**DEFENSE STANDARDIZATION PROGRAM**

**STANDARDIZATION  
DIRECTORY**

**(FSC CLASS AND AREA ASSIGNMENTS)**

REVISED AS OF

**1 July 2016**

**STDZ**

## **FOREWORD**

The Standardization Directory (SD-1) provides the following information:

A list of all DOD Standardization Management Activities (SMA), which includes:

Addresses, phone and fax numbers, e-mail addresses, and points of contact.

The SMA's areas of document interest by Federal Supply Class (FSC) or Standardization Area

The SMA's item reduction Study interest by FSC.  
SD-1 Code Assignment.

A list of civilian agency standardization offices, which includes:

Addresses, phone and fax numbers, e-mail addresses, and points of contact.

The civil agency's areas of interest by FSC or Standardization Area.  
SD-1 Code Assignment.

Assignments of Lead Standardization Activities and Departmental Standardization Activities by FSC and Standardization Area.

A list of Federal Supply Groups (FSG), FSC's, and Standardization Areas, and definitions for the Areas.

Data Item Description (DID) Approval Authorities.

Changes to this Directory are marked with an asterisk to indicate changes from the last issue. Previous editions of this Directory are hereby superseded.

This Directory is published four times a year—in January, April, July and October. Each standardization management activity shall send **non-routine** changes (i.e., changes which add or delete standardization codes, FSCs, AREAs, or any changes in areas of responsibility) to the appropriate office listed below. The offices below, after any required coordination with DSPO (such as transfers of responsibility between Services/Agencies), will forward the changes to the DSPAO, 700 Robbins Avenue, Building 4D, Attn: SD-1 Administrator, Philadelphia, PA 19111-5095 or email: [alice.shannon@dla.mil](mailto:alice.shannon@dla.mil). Changes may be made at any time. To be included in the next quarterly update, changes should be to the DSPAO by the end of December, March, June or September to be reflected in the next quarterly issuance.

Individuals in standardization management activities who have been given access to make routine-only changes (address, phone, fax, e-mail changes) may do so via the ASSIST SD-1 Module. See Enclosure 7, paragraph 10.b of DoDM 4120.24, "Defense Standardization Program (DSP) Procedures." Routine-only changes may be made directly to the SD-1 database via the ASSIST SD-1 module by those who have been given access to do so through their DepSO.

Those who do not have access to the ASSIST SD-1 module and who wish to make routine-only changes, may do so by e-mailing changes to [alice.shannon@dla.mil](mailto:alice.shannon@dla.mil) by phoning at (215) 697-6631, DSN 442-6631; or by fax at (215) 697-9398, DSN 442-9398.

### **Standardization Activity**

OSD, DOD activities not listed below, and non-government standards bodies

## **GENERAL DEFINITIONS**

Departmental Standardization Office (DepSO). A top level office in each Military Department or Defense Agency responsible for managing the Defense Standardization Program and ensuring that its Lead Standardization Activities and Standardization Management Activities properly implement the policies, procedures, and goals of the Defense Standardization Program.

FSG, FSC, and Area Codes. Federal Supply Group (FSG), Federal Supply Class (FSC), and Standardization Area codes. For a more complete description of FSGs and FSCs, see Cataloging Handbook H2-1, Federal Supply Classification, Part 1, Groups and Classes.

Item Reduction Activity. An activity responsible for conducting item reduction studies in accordance with DoDM 4120.24.

Lead Standardization Activity (LSA). The activity responsible for managing DOD standardization efforts in an Area or Federal Supply Class.

Non-Government Standards Body. A private sector association, organization, or technical society that plans, develops, establishes, maintains, or coordinates private sector standards, specifications, and other types of standardization documents.

Departmental Standardization Activities. The activity designated by its DepSO to represent the department in interdepartmental standardization efforts.

Standardization Area. A standardization category that encompasses a broad engineering discipline, practice, and manufacturing technology and is not susceptible to categorizing in the Federal Supply Classification system.

Standardization Management Activity (SMA). A generic term to describe any organization listed in the SD-1 that functions as a Lead Standardization Activity, Preparing Activity, Departmental Standardization Activities, Military Coordinating Activity, Custodian, Review Activity, Adopting Activity, or Item Reduction Activity.

## **STANDARDIZATION AREA CODES AND DESCRIPTIONS**

Established Standardization Areas are listed below. Area descriptions are provided as guidance in categorizing documents not susceptible to categorizing in the Federal Supply Classification system.

<b><u>AREA</u></b>	<b><u>TITLE (AREA Description Below Title)</u></b>
ADMN	Administrative Data  This area covers non-technical data required by contracting officers and other personnel for the Government administration of the overall provisions of the contract, excluding management and financial data. As a minimum, the following subjects are covered: (1) security system engineering; military history, responsibilities and policies and procedures for safeguarding classified material; (2) audio-visual data such as recorded information on photographic records; motion picture films and microfilm developed in support of a project; recorded information on view graphs, video tapes and slides (3) documents describing meeting agendas and minutes. <b>Note:</b> This AREA is to be used for Data Item Descriptions (DIDs) and shall not be used for any other standardization documents.
ATTS	Automatic Test Technology Standards  This AREA establishes standard methods, procedures, techniques and design criteria for providing automatic test capability in defense systems and equipments. It excludes automatic test equipment and accessories that are covered by FSC 6625.
AVCS	Avionics  This AREA applies to all requirements pertaining to the economy of avionics operations and resources, including but not limited to process, measurement, product, interchangeability, compatibility, commonality, interoperability, and service/allied operations. It covers all resources for electronic, electro-optic, and electromechanical systems and subsystems (hardware and software) installed in or attached to an aircraft. It includes systems that interact with the crew and other aircraft systems in the areas of: communications (C) controls and displays (ID), navigation (N), reconnaissance (RE), systems integration (SI) and target acquisition/strike (TA/S) and in the technology and functional areas of weapons delivery, identification, instrumentation, electronic warfare, flight controls, engine controls, power distribution, support equipment, sensors, transducers, antennas, processing elements, system interfaces, networks, buses, and associated software.
CBRN	Chemical, Biological, Radiological, and Nuclear  This AREA applies to all requirements and procedures pertaining to chemical, biological, radiological and nuclear (CBRN) contamination survivability. The CBRN AREA incorporates compatibility, decontaminability, and hardness characteristics and considerations into design and testing of military systems, equipment, and facilities that may see CBRN contaminated environments and be required to survive and continue to operate in or after exposure to such environments. Standards related to surviving the deleterious effects resulting from nuclear detonations should be placed in the Nuclear Survivability (NUSU) standardization area. The electromagnetic environment is also excluded as it is covered under the Electromagnetic Compatibility (EMCS) standardization area.

<u>AREA</u>	<u>TITLE (AREA Description Below Title)</u>
CMPS	Composites Technology  This AREA encompasses standardization documents for materials and processing (M&P) technology that are pertinent to composites manufacturing and applications. This includes the M&P technology of fiber reinforcements and matrices used in composites manufacturing, the design and fabrication of composites, and standard test methods for determining the properties of composites and their constituent materials. This AREA includes the M&P technology of primary classes of composites materials including: polymer matrix composites (PMC), metal matrix composites (MMC), and ceramic matrix composites (CMC).
DCPS	Data Communications Protocol Standards  This AREA establishes DOD protocol standards and reference protocol architectures necessary to support intranet-work and internet-work host-to-host data communications utilizing digital communications techniques. The DCPS AREA involves standardization of internet-work, peer and interlayer management protocols, including those that deal with end-to-end (host-to-host) communications across a network or a concatenated set of networks. The standardization of lower layer protocols, those that deal with the physical, data link, and network functions, do not fall within the domain of the DCPS AREA. However, the DCPS AREA actively coordinates with those standardization activities developing and coordinating those lower layer protocols to ensure that the interfaces allow interoperability.
DRPR	Drawing Practices  This AREA relates to engineering practices to define, record and communicate concepts and design and production requirements in a concise, graphic form with standard symbols, abbreviations and text on drawing and associated lists.
EDRS	DOD Engineering Data Reproduction Systems  This AREA covers reproduction systems required for recording, reproducing, storing, retrieving, and distributing engineering documents and related information by electronic, optical, or microform methods, or combination thereof.
EGDS	Engineering Data Systems  This AREA relates to the automated processing of engineering data documentation used in support of research and development, design and engineering, procurement and supply and maintenance of defense materiel.
EMCS	Electromagnetic Compatibility Standards  This AREA covers requirements and procedures to achieve electromagnetic compatibility within all frequency ranges of platforms, facilities, electrical and electronic systems/equipment, circuits and components. Included are: (1) standards for prediction, measurement and validation for electromagnetic compatibility; (2) standards for techniques and procedures relating to grounding, bonding and shielding; (3) standards for prevention and control of electromagnetic radiation to personnel and equipment (including hazardous materiel and substances); and (4) standards for surviving the electromagnetic environment (e.g. electric and magnetic fields) resulting from a nuclear detonation, system-generated electromagnetic pulse (EMP) or high-power microwaves (HPM).
ENVR	Environmental Requirements and Related Test Methods  This AREA encompasses environmental definitions, environmental design criteria (both natural and induced) and related test and evaluation methods. The electromagnetic environment is excluded as it is covered under EMCS.
FACR	Facilities Engineering and Design Requirements  This AREA covers standard general facilities engineering and design criteria, practices, guidelines, and related to requirements. Specifications and Standards related to specific building products And materials are not covered by this area but in the appropriate FSG/FSC.

<u>AREA</u>	<u>TITLE (AREA Description Below Title)</u>
FNCL	<p>Financial Data</p> <p>This area covers all financial or dollar data, actual or estimated, for expenditures, forecasts, status accounting, and any other record keeping or data required by contract provisions to be expressed in financial or dollar terms. Other items covered include: (1) Documents generated for contract cost reporting, such as the contract funds status report, cost summary report, cost/schedule status report, and cost/schedule control description; (2) documentation associated with the breakdown of contractor tasks into tracking elements, such as work breakdown elements used for contract schedule and cost reporting; (3) documents associated with design-to-cost, where cost is a key design parameter and life cycle cost, which encompasses the cost of development, acquisition, operation, support and where applicable disposal. Documents include the Design to cost Plan, Life Cycle Cost Report, and Target Prices versus Actual Forecast; and (4) documents generated as a result of a value- engineering program, including documents that set forth a change in contractual documents such as Value Engineering Data Report, Value Engineering Plan, and Task Change Proposal.</p> <p><b>Note: This AREA is to be used for Data Item Descriptions (DIDs) and shall not be used for any other standardization documents.</b></p>
FORG	<p>Forgings</p> <p>This AREA relates to metal forging processes, procedures and technology.</p>
GINT	<p>Geospatial Intelligence Technology</p> <p>Any standards relating to geospatial intelligence (GEOINT) as defined in 10 U.S.C. §467, Definitions, par. (5). the term "geospatial intelligence" means the exploitation and analysis of imagery and geospatial information to describe, assess, and visually depict physical features and geographically referenced activities on the earth. Geospatial intelligence consists of imagery, imagery intelligence, and geospatial information.</p>
HFAC	<p>Human Factors</p> <p>This AREA encompasses human factors engineering, which incorporates human characteristics and considerations into design of military systems, equipment, and facilities. The HFAC AREA includes tasking requirements and technical data for analysis, design (including initial design and analysis of user tasks), test, and evaluation during acquisition. It also includes design criteria, expressed as requirements and guidelines, as they apply to those who will operate, control, maintain, supply or transport the materiel. The AREA also encompasses environmental considerations including limits for maximum exposure, human performance, habitability, and vulnerability. Manpower, personnel, and training (MPT) considerations apply only to the degree that they affect the human performance aspects of design.</p>
INST	<p>Information Standards and Technology</p> <p>This AREA encompasses report standards, data exchange format standards, graphic, and imagery constructs. It includes the structure, values, definition, and representation of data that gives it meaning, enhances information sharing and exchange, and facilitates effective decision-making based on a DoD-wide commonality of representation and understanding of specific bits of information. Standard structures and formats include character and bit oriented syntax as well as graphics, imagery, and geographical constructs. These information structure are derived from the combination and use of standard data elements and codes to convey precise meaning.</p>

<u>AREA</u>	<u>TITLE (AREA Description Below Title)</u>
IPSC	Information Processing Standards for Computers  This AREA relates to computers and data processing devices, equipments and systems including, but not limited to, character recognition types; input/output media, formats and labels; programming languages; computer documentation; flowcharts and terminology; character codes; data communications and input/output interfaces.
MCCR	Mission Critical Computer Resources  This AREA encompasses standards used in mission critical defense computer systems, related software (development environments, support software, application programs, firmware, and data bases) and associated documentation.
MECA	Metal Castings  This AREA covers metal castings produced by a variety of processes and techniques such as: green and dry mold, shell, core, permanent and ceramic mold; expandable pattern; centrifugal; continuous and iron die-casting.
MFFP	Metal Finishes and Finishing Processes and Procedures  This AREA relates to metal finishes and processes such as metallic coatings, anodic coatings, and chemical treatments and coatings. It also covers corrosion and corrosion control of metals.
MGMT	Management  This AREA covers data required by the Government to manage, provide visibility, and enforce contractual requirements in the form of record keeping or deliverable products concerning project management milestones, technique, status (excluding financial and technical), milestones, problems, plans, and other data not technically or financially oriented. Documents related to management policies and concepts for particular programs or projects include Master Plan, Procedures for Determining Responsibility of Prospective Contractors, and various progress Status Reports, planning documents, and Program Management Plan. This AREA also includes documents related to the establishment and maintenance of Government property, i.e., status of condition, deficiency, and inventory. Examples of related documents are GFI Deficiency Report, Support Equipment Delivery, Schedule/Delinquency Report, and Defective Material Report. <b>Note: This AREA is to be used for Data Item Descriptions (DIDs) and shall not be used for any other standardization documents.</b>
MISC	Miscellaneous  This AREA is reserved for those standardization documents that cannot, by definition, be assigned to a currently established Federal Supply Class, or standardization area.

<u>AREA</u>	<u>TITLE (AREA Description Below Title)</u>
MSSM	<p>Modeling and Simulation Standards and Methodologies</p> <p>This area includes standards, methodologies, practices, procedures, techniques, specifications, data requirements and databases for the development and operation of DoD computer-based models and simulations that improve the effectiveness, readiness, and interoperability of US forces in the execution of DoD missions. It encompasses interoperability of models and simulations in federations and confederations, the reusability of model components, representations of human-made structures and systems, natural environmental representations, composable mission space environments and knowledge integration. It also covers the application of verification, validation and accreditation methodologies, practices, procedures, techniques to models, simulations, and related data in accordance with DoDI 5000.61. The development and fielding of common M&amp;S tools, methodologies, and databases; establishment of M&amp;S standards and protocols promoting readiness, interoperability, data exchange, open system architecture, and software reusability of M&amp;S applications are also included as directed by DoDD 5000.59 and outlined in DoD 5000.59-P.</p>
NDTI	<p>Nondestructive Testing and Inspection</p> <p>This AREA relates to nondestructive testing (NDT) methods of inspection, qualification of NDT equipment and personnel, and reference standards for acceptance inspection. It excludes NDT equipment and accessories.</p>
NUOR	<p>Nuclear Ordnance</p> <p>This AREA includes standardization documents covering engineering criteria, practices, requirements and items (not properly included in Federal Supply Group 11) unique to nuclear ordnance, due to design, security, quality, storage, safety or transportability requirements.</p>
NUSU	<p>Nuclear Survivability</p> <p>This AREA applies to protection standards, hardened electronics, testing protocols, and experimental environments, that reflect realistic prompt nuclear weapons effects to support nuclear survivability programs. Included are: (1) standards defining the various nuclear environments (e.g., blast, thermal, and prompt radiation resulting from a nuclear detonation), (2) standards for protection from the various nuclear environments and (3) design handbooks. This AREA does not cover requirements for military systems, equipment, and facilities to continue operation after exposure to a nuclear environment. Standards related to continued operation in a nuclear environment and nuclear decontamination should be placed in the Chemical, Biological, Radiological, and Nuclear (CBRN) standardization area.</p>
PACK	<p>Packing, Packaging, Preservation and Transportability</p> <p>This AREA includes packaging, packing and preservation of defense materiel. Transportability is included whenever transportation requirements are a part of a packaging systems document.</p>
PSSS	<p>Product Support Standards and Specifications</p> <p>This AREA includes standards, specifications, and other related technical documentation for analyzing, developing, and defining supportability and support requirements as well as for acquiring product support elements and sustaining DOD systems or system modification programs.</p>
QCIC	<p>Quality Control/Accurance and Inspection</p> <p>This AREA covers general methods and techniques intended to provide assurance that material, data, supplies and services conform to established technical requirements and achieve satisfactory performance.</p>

<u>AREA</u>	<u>TITLE (AREA Description Below Title)</u>
REPS	Radio-Frequency Exposure to Personnel Safety Standardization  This AREA covers requirements and procedures for supporting activities and research required for biologically based scientific standards for safe operations of Radio-Frequency Radiation (RFR) systems to ensure environmental safety and occupational health of Department of Defense (DoD) personnel. Included in this area are: (1) biologically-based safety standards for limiting RFR exposure to personnel; (2) biological/medical aspects associated with the development of personnel exposure limits to RFR; and (3) biologically-based safety standards for limiting exposure of personnel from High Power Microwave (HPM), electromagnetic pulse (EMP), and Ultra-Wide-Band forms of non-ionizing radiation.
SAFT	System Safety  This AREA related to: (1) safety design, test and demonstration requirements for military systems; equipments, facilities and personnel interfaces; (2) safety procedures; (3) joint area safety requirements and (4) system safety engineering program requirements and plans. Excluded are standards relating to explosive and fuze safety, environmental and occupational safety, and specific safety equipments.
SESS	Systems Engineering Specifications and Standards  This area includes standards, specifications, methods, practices, techniques, and data requirements for analyzing, developing, and defining the technical engineering requirements for new and modified DOD systems as defined in DODD 5000.01, DODI 5000.02. This AREA specifically encompasses procedural guidance to address those systems engineering elements executed throughout the acquisition process under DODI 5000.02, which includes configuration management of the technical baseline information, data management, reliability, manufacturing, producibility, and design, development, and test activities. This area does not include Human Factors, Environmental, Product Support, Quality Control, or System Safety.
SOLD	Soldering  This AREA covers the processes for making metallic junctions in which the surfaces are joined under elevated temperatures by the surface wetting and subsequent coalescence of liquid solder having a much lower melting point than any of the metals being joined (generally below 426EC; 800EF). Requirements, procedures and inspection criteria for soldering processes ranging from general fabrication of non-electrical assemblies to soldering electrical and electronic connections are included.

<u>AREA</u>	<u>TITLE (AREA Description Below Title)</u>
SPVT	Space Vehicle Technology  This AREA includes standards, specifications, handbooks and other related technical documentation for acquiring space vehicles, space launch vehicles, and associated ground elements. Documentation topics include, but are not limited to: design, construction, testing, parts, safety, and maintenance support.
STDZ	Standardization  This AREA covers documents that establish the content and format criteria for specifications, standards, and other related standardization documents that do not specifically belong in any other Federal Supply Class or AREA. This AREA also covers documents that provide direction and guidance for implementing the Defense Standardization Program.
TCSP	Technical Support  This area includes technical documentation not encompassed by the MGMT area relating to facilities, cataloging, property control, contractor engineering technical services, and acquisition. <b>Note: This AREA is to be used for Data Item Descriptions (DIDs) and shall not be used for any other standardization documents.</b>
TCSS	Telecommunications System Standards  This AREA establishes uniform engineering criteria for terminal equipment, transmission equipment, and switching equipment to ensure interoperability within military telecommunications systems and, in many cases, interoperability with federal systems and common carriers. Activities within the TCSS AREA include participation in federal, commercial, and international standard forums, as well as development of military-unique telecommunications standards and handbooks. The TCSS AREA includes communications systems in support of computer data transfer, as well as the more conventional telecommunications services such as voice, video, and facsimile. The TCSS AREA applies to services provided over a broad spectrum of transmission media and under widely varying environmental and physical conditions.

<u>AREA</u>	<u>TITLE (AREA Description Below Title)</u>
THDS	Screw Threads  This AREA establishes standards for screw threads and other items associated with the purchase and/or use of interchangeable threaded parts, including basic requirements for assembly, interchangeability, strengths and installation/removal torques.
THJM	Thermal Joining of Metals  This AREA is concerned with the thermal joining of metals processes (welding and brazing), but excludes soft (low temperature) soldering (see SOLD AREA). It includes low-temperature brazing (also known as hard soldering or silver soldering). It does not include equipment or accessories.
TMSS	Technical Manual Specifications and Standards  This AREA covers the requirements for technical manual preparation, including those requirements to facilitate TM deliverables in digital format. It addresses the technical content and format of weapon systems, weapon systems components, and support equipment technical manuals used for operation, maintenance and repair of systems and equipment. Document Type Definitions (DTDs) and Format Output Specification Instance (FOSI) developed as appendices to the TMSS documents are also covered by this standardization AREA, as well as administrative and management data such as status reports, validation plans and schedules relating to technical manuals.

- NOTES:**
1. AREA TELE, Federal Telecommunications Standards, is used for ASSIST indexing purposes only. It is not a DoD standardization AREA assignment.
  2. SLHC and TCTS have been merged into one area - TCSS.
  3. SDMP has been replaced by STDZ.

## **DATA ITEM DESCRIPTION (DID) APPROVAL AUTHORITIES**

“All DIDs must be reviewed in accordance with MIL-STD-963C, Data Item Descriptions. DIDs must be submitted to the appropriate DID approval authority listed below for final approval. Contact information may be found in the appropriate section of this directory. DID approval authorities will send approved DIDs to the Defense Standardization Program Automation Office (DSPAO) using the ASSIST Electronic Document Submission tool as required by DoDM 4120.24, Enclosure 12, paragraph 5.e. AMSC and DID numbers are issued through the ASSIST Automated Document Number module at <https://assist.dla.mil>.”

**The following DID approval authority offices are listed in this directory in their appropriate Service/Agency sections.**

**OSD – Code SO**

**Army – Code AM**

**Navy – Code SA**

**Air Force – Code 10**

**DLA – Code DH**

**NGA (National Geospatial-Intelligence Agency) - Code MP**

**NSA (National Security Agency) – Code NS**

**DTRA (Defense Threat Reduction Agency) – Code DS**

**Additional information, including links to DID processing offices, can be found on the DSP website at:**

<http://www.dsp.dla.mil/APP UIL/poc.aspx?action=content&accounttype=displaypoc&typecodeid=205&contentid=49>

## PART 1

### STANDARDIZATION MANAGEMENT ACTIVITY (SMA) LIST

This index shows DOD SMAs and other interested organizations that participate in the conduct of the Defense Standardization Program. These activities function as lead standardization, participating, and review activities or departmental custodians as defined in the DoDM 4120.24 "Defense Standardization Program (DSP) Procedures". To facilitate use of Part 3 of this directory, this part is primarily sectionalized by Military Department, Defense Agency, and other elements of the Federal Government.

## PART 2

### STANDARDIZATION ASSIGNMENTS

This part assigns the Lead Standardization Activities and Departmental Standardization Activities for Standardization Areas, Federal Supply Groups (FSG), and Federal Supply Classes (FSC). It also identifies the item reduction activity for each FSC. See DoDM 4120.24, "Defense Standardization Program (DSP) Procedures" for an explanation of assignment functions.

## **PART 3**

### **POINTS OF CONTACT**

This part provides the names, addresses, and phone numbers for standardization points of contact in the DoD, civilian agencies, and non-government standards bodies. In addition, this part identifies the Standardization Areas and FSCs in which DoD SMAs and civilian agencies have an interest and should review standardization documents and item reduction studies. See DoDM 4120.24, "Defense Standardization Program (DSP) Procedures" for the procedures and extent of document coordination.

**PART 3**

This page intentionally left blank.

**PART 3**  
**SECTION I**  
**OFFICE OF THE SECRETARY OF DEFENSE**

Information listed should be current at the time of publication. All changes, additions or deletions of the activities' addresses, telephone numbers, points of contact (POCs) and other data for this section should be submitted, as mark-up copy, to the address listed herein for "SO".

PART 3

**Air Force Agency for Modeling and Simulation (AFAMS)  
Standardization Code: 49**

1. AFAMS Live, Virtual, Constructive (LVC) Foundations Division  
AFAMS/MSF  
3051 Technology Parkway  
Orlando, FL 32826

NOTES: AFAMS is a Field Operating Agency (FOA) of the Headquarters United States Air Force (HQ USAF) under the Deputy Chief of Staff for Operations, Plans and Requirements (AF/A3/5), under the direction of the Director of Operations (AF/A3O). Its mission is to provide seamless integration of cross functional Live, Virtual and Constructive (LVC) environments for operational training that allow warfighters to maximize performance and decision making. AFAMS actively participates in standardization efforts with other Services, non-government standards development organizations, and international standardization activities to develop and maintain defense, non-government, and international specifications, standards and other DSP documents. Specifically, AFAMS is a DoD and AF DoD Information Technology Standards Registry Technical Working Group (DISR TWG) voting representative for Modeling and Simulation (M&S), serves on the Simulation Interoperability Standards Organization (SISO) Standards Activity Committee (SAC), participates in SISO product development groups and forums, and collaborates with the DoD LSA for MSSM.

DEPARTMENT OF THE AIR FORCE**

**Air Force Life Cycle Management Center - Cataloging and Product Support  
Standardization Code: 99**

1. AFMC AFLCMC/EZSS  
Suite 5, Bldg. 70  
Attn: Defense Standardization Program/Specifications and Standards  
5215 Thurlow St  
Wright Patterson AFB, OH 45433-5750

**NOTES:** Standardization POC for review of all documents where code 99 is listed as the Air Force custodian or reviewer activity. Include code 99 in the coordination of all documents, which lists activity code 84 as reviewer. Responsible for planning and administration of the standardization program for code 99. Activity 99 acts as agent activity on selected documents for Code 84. Contact the focal point AFMC AFLCMC/EZSS if you need help or have questions. Activity 99, is designated as the Air Force Item Reduction Study (IRS) Custodian for every Federal Supply Group and Federal Supply Class in which the Air Force has an interest, with the exception of all FSCs in the following groups: 11GP, 65GP, 68GP, 91GP. Responsible for administration of the IRS program for AFMC.

NOTES: POC for general Hill AFB standardization management matters, including subjects involving the AF Sustainment Center Standardization Executive. AF Code 170 indicates the engineering support activity responsible for preparation of AF Life Cycle Management Center standardization documents at Hill AFB. Requests for transfer of standardization documents to AF Code 170 are to be sent through AF Code 10. Direct correspondence to AF Code 170 is authorized for coordination of draft standardization documents for determination of interest in FSGs/FSCs listed above and for existing documents identifying AF Code 170 as an AF review activity. AF custodian will provide consolidated comments to the preparing activity.

Arnold, MO 63010-6238

**NOTES:** NGA serves as the DoD lead for Geospatial Intelligence (GEOINT) standards and prescribes, mandates, and enforces standards and architectures related to GEOINT and GEOINT tasking, collection, processing, exploitation, and international geospatial information for the DoD Components and for the non-DoD elements of the Intelligence Community (IC), to include: (a) Standards for end-to-end architectures and embedded interfaces related to GEOINT. (b) Standards for geospatial aspects of natural and man-made features across the environmental domains of Earth, the atmosphere, and near-Earth space. (c) Standards for GEOINT collected or produced within the Department of Defense. (d) Technical guidance and direction to the DoD Components and other components of the National System for Geospatial Intelligence (NSG) regarding standardization and interoperability of systems requiring, exploiting, and/or disseminating GEOINT. NGA represents the Department of Defense in national and international geospatial information standardization activities, and provides the principal US representative to the NATO Joint Geospatial Standards Working Group, and develops the US position on proposed new/revised NATO Standardization Agreements (STANAGs) dealing with GEOINT and related matters.

Arnold, MO 63010-6238

**NOTES:** NGA serves as the DoD lead for Geospatial Intelligence (GEOINT) standards and prescribes, mandates, and enforces standards and architectures related to GEOINT and GEOINT tasking, collection, processing, exploitation, and international geospatial information for the DoD Components and for the non-DoD elements of the Intelligence Community (IC), to include: (a) Standards for end-to-end architectures and embedded interfaces related to GEOINT. (b) Standards for geospatial aspects of natural and man-made features across the environmental domains of Earth, the atmosphere, and near-Earth space. (c) Standards for GEOINT collected or produced within the Department of Defense. (d) Technical guidance and direction to the DoD Components and other components of the National System for Geospatial Intelligence (NSG) regarding standardization and interoperability of systems requiring, exploiting, and/or disseminating GEOINT. NGA represents the Department of Defense in national and international geospatial information standardization activities, and provides the principal US representative to the NATO Joint Geospatial Standards Working Group, and develops the US position on proposed new/revised NATO Standardization Agreements (STANAGs) dealing with GEOINT and related matters.
